JUAN RODRIGUEZ

juan@juan.codes – (301) 305-8799 – Frederick, MD – juan.codes – LinkedIn – GitHub

OBJECTIVE

Entry-level software developer with hands-on experience in ASP.NET, Django, Hugo, and RESTful APIs. Driven to leverage experience in agile development and scrum, and to utilize my major in Information Systems Management. Eager to fill a software development or IT support role with opportunities for personal growth and development.

SKILLS

Certifications: AWS Cloud Practitioner, CompTIA A+
Languages: Python, C#, HTML, CSS, JavaScript
Development: Hugo, Django, ASP.NET, RESTful APIs
UI/UX Design: GIMP, Inkscape, Adobe Creative Suite
Other Skills: Version Control (Git), Agile/Scrum

EDUCATION

University of Maryland Global Campus – **B.S. in Information Systems Management** (Dec. 2019)
Cum Laude, GPA 3.9
Frederick Community College – **A.S. in Information Systems Management** (May 2017)

RELEVANT EXPERIENCE

Central Maryland Martial Arts – Frederick, MD   Feb. 2018 to Present
Web Developer
- Developed, deployed, and maintained a responsive and website, improving user engagement and accessibility.
- Collaborated with instructors and staff to build digital resources that enhanced internal operations and the student learning experience.

Instructor
- Instructed students in a dynamic environment, emphasizing inclusive teaching and mentorship.

iHire, LLC. – Frederick, MD   Jan. 2022 – June 2022
Software Development Intern
- Designed and built features using ASP.NET in collaboration with cross-functional teams and fellow interns.
- Participated in Agile sprints, code reviews, and iterative testing to ensure timely, high-quality deliverables.
- Resolved technical issues and improved the user experience through iterative feedback and testing.
- Applied responsive design and accessibility standards to project components.

Individual Projects
TechFrederick 2020 Hackathon
- Awarded one of three first-place positions in a two-week programming competition by developing a Django-based records management system for Frederick Maryland Fire & Rescue. Design best practices and streamlined workflows were integrated for the purpose of supporting emergency responders.
